INSULATION TESTER · HAND-DRIVEN, BAKELITE BODY

CIE/555

A compact, silent hand-driven insulation tester in a high-grade moulded bakelite body — available in single-range configurations from 100V to 1000V.

BAKELITE BODY

Insulation Tester — Bakelite Body

A hand-driven generator-type insulation tester in a compact, high-grade moulded bakelite body — a lighter, more economical option than CIE's metal- or wooden-bodied testers, for direct-reading insulation resistance testing on lower-voltage panels and general electrical maintenance work.

- **No batteries required** — hand-driven clutch-type generator
- **Silent generator** — smooth clutch-type mechanism
- **Compact bakelite body** — dust-free, rubber shoes for stability
- **Collapsible driven handle** — folds flush into casing
- **High-sensitivity cross-coil indicator** — quick direct reading

Supplied as base instrument only — carrying case and test leads available at extra cost.

Manufactured in India since 1963 — trusted by various State Electricity Boards, Indian Railways, cement and metal industries, and other sectors.

- V **100–1000V** Available ranges, specify at order
- B **Battery-Free** Hand-cranked generator
- S **3 Seconds** Response time

01 Full Specification Sheet

PARAMETER	SPECIFICATION
Body	Moulded high-grade bakelite
Generator Type	Hand-driven, clutch-type generator
Indicator	High-sensitivity cross-coil
Scale Length	75 mm (approx.)
Accuracy	Conforms to IS: 2992-1987
Rotation Speed	160 r.p.m.
Response Time	3 seconds
Rated Voltages Available	100V / 250V / 500V / 1000V (single range per unit)
Resistance Range Available	0–500 M Ω (any one range per unit, paired with rated voltage)
High Voltage Test	Min. 2000V or (rated V + 1000)V A.C. r.m.s., 1 min
Insulation Resistance Test	Better than 50 M Ω at 500V D.C.
Dimensions (L×W×H)	155 × 104 × 70 mm (approx.)
Weight	1.4 kg (approx.)
Warranty	12 months against manufacturing defects

Any range apart from the standard voltage & resistance ranges above can be built to order.

02 Typical Applications

- Insulation testing of electrical operating machines
- Motors, generators, and other rotating machinery
- Insulation control and switching equipment testing
- Distribution network and communication cable testing
- Insulator and transformer insulation checks
- Industrial installation, wiring, and fault-location checks

03 Optional Accessories

- + Carrying case (bakelite body)
- + Testing leads, 1m
