INSULATION TESTER · HAND-DRIVEN, BAKELITE BODY

# CIE/555

A compact, silent hand-driven insulation tester in a high-grade moulded bakelite body — direct insulation resistance testing up to 1000 V.

UP TO 1000V

## Insulation Tester — Bakelite Body

A hand-driven generator-type insulation tester in a compact, high-grade moulded bakelite body — a lighter, more economical option than CIE's metal- or wooden-bodied testers, for direct-reading insulation resistance testing on lower-voltage panels and general electrical maintenance work.

- **No batteries required** — hand-driven clutch-type A.C. generator
- **Silent generator** — smooth clutch-type mechanism
- **Compact bakelite body** — dust-free, rubber shoes for stability
- **Collapsible driven handle** — folds flush into casing
- **High-sensitivity cross-coil indicator** — quick direct reading
- **4 rated voltages** — 100V to 1000V, build-to-order

Supplied as base instrument only — carrying case and test leads available at extra cost.

*Manufactured in India since 1963 — trusted by MSEB, Indian Railways, WBSETCL, etc.*

- V 100–1000V** Rated voltage range
- 0 Battery-Free** Hand-cranked generator
- 3 3 Seconds** Response time

### 01 Full Specification Sheet

| PARAMETER                         | SPECIFICATION                                      |
|-----------------------------------|----------------------------------------------------|
| <b>Body</b>                       | Moulded high-grade bakelite                        |
| <b>Generator Type</b>             | Hand-driven, clutch-type A.C. generator            |
| <b>Indicator</b>                  | High-sensitivity cross-coil                        |
| <b>Scale Length</b>               | 75 mm (approx.)                                    |
| <b>Accuracy</b>                   | Conforms to IS: 2992-1987                          |
| <b>Rotation Speed</b>             | 160 r.p.m.                                         |
| <b>Response Time</b>              | 3 seconds                                          |
| <b>Rated Voltages</b>             | 100V / 250V / 500V / 1000V                         |
| <b>100V Range Options</b>         | 0–10 · 0–20 MΩ                                     |
| <b>250V Range Options</b>         | 0–20 · 0–50 MΩ                                     |
| <b>500V Range Options</b>         | 0–50 · 0–100 · 0–200 · 0–500 MΩ                    |
| <b>1000V Range Options</b>        | 0–100 · 0–200 · 0–500 MΩ                           |
| <b>High Voltage Test</b>          | Min. 2000V or (rated V + 1000)V A.C. r.m.s., 1 min |
| <b>Insulation Resistance Test</b> | Better than 50 MΩ at 500V D.C.                     |
| <b>Dimensions (L×W×H)</b>         | 155 × 104 × 70 mm (approx.)                        |
| <b>Weight</b>                     | 1.4 kg (approx.)                                   |
| <b>Warranty</b>                   | 12 months against manufacturing defects            |

**BUILD TO ORDER** Standard voltage & resistance ranges above — need something different? We can build it.

### 02 Typical Applications

- Insulation testing of electrical operating machines
- Rotating plant equipment and stationary apparatus checks
- Insulation control and switching equipment testing
- Distribution network and communication cable testing
- Insulator and transformer insulation checks
- Industrial installation, wiring, and fault-location checks

### 03 Optional Accessories

- + Carrying case (bakelite body)
- + Testing leads, 1m
